ST Logistics

SECURITY MANAGEMENT POLICY

The ST Logistics' security policy provides the foundation for all security related issues and activities within ST Logistics aiming to promote security at the workplace and the collective responsibility of the management and all employees in observing security practices. As part of our security management system framework, ST Logistics aims to provide a safe and secure operating environment by protecting the following from potential threats:

a.   our employees,

b.   assets and information belonging to our company and customers,

c.   integrity and reputation.

To achieve this objective, we will ensure that our security management system is in compliance with

a.   ISO 28000,

b.   ST Logistics' organizational policies,

c.   Current applicable legislation, regulatory and statutory requirements and with other requirements to which ST Logistics subscribes to.

ST Logistics is committed to ensuring the security of our operations and protection of our customer assets through the continual improvement of our security management system. This policy will be effectively communicated to our internal and external stakeholders so that they will be aware of our security expectations.
